-----

South Africa's record for solar deployment in a calendar year is 2.6 GW from 2023. SAPVIA told pv magazine that as of mid-2025, South Africa's cumulative solar capacity is estimated at...

Installed capacity continues to grow, with solar and wind emerging as the backbone of the new generation. However, grid bottlenecks, particularly in the Cape provinces and the Northern Corridor, ...

Installations of solar power in Africa jumped 54% in 2025, new data shows, marking the fastest annual growth on record, driven by governments and development agencies deploying utility ...

(SAREM) An inclusive industrial development plan for the renewable energy and storage value chains by 2030 2 April 2025 The Department of Trade, Industry and Competition (the dtic), November 2020 ...

The Solar & Energy Storage Future South Africa 2025 event, organized by Energy Box, will take place in Cape Town on July 24, 2025. This event focuses on the latest advancements in ...

Solar energy will remain one of the cornerstones of South Africa 's renewable energy landscape in 2025. The country's abundant solar resources, combined with declining costs of...

The Africa Market Outlook for Solar PV: 2026-2029, released Tuesday, shows that the continent added 54 per cent more capacity in 2025 than in 2024, the highest annual increase ever ...

In April 2025, South Africa announced plans to install 3 GW to 5 GW of new renewable energy capacity/year until 2030 under the South African Renewable Energy Master Plan (SAREM). The ...

Held in early March 2025, the conference also introduced innovative energy solutions aimed at strengthening South Africa's energy security.

The session highlighted the critical role of solar power and energy storage in enhancing energy security and supporting Africa's energy transition toward sustainability.
