The project will allow South Tarawa to increase renewable energy grid penetration from 9% to 44.45%, thereby exceeding the government target for South Tarawa of 36% renewable energy penetration by ...

Manila. The Facility is designed to finance renewable energy projects in the PIC-11 countries to transform their power sectors from diesel to sustainable renewable energy generation sources and ...

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy storage system.

The \$8.87 million energy sector program aims to provide improved access to affordable, reliable, and clean energy on Kiritimati Island through a high-voltage network connecting the population centers, ...

The project will ultimately drive down the cost of power generation, reduce the country's reliance on imported fossil fuels, and enhance institutional capacity across the sector, including through creation ...

The South Tarawa Renewable Energy Project (STREP or the Project) will support upscaling of solar power generation in Kiribati. The Project will reduce dependence on fossil fuel imports by increasing ...

Welcome to South Tarawa, Kiribati - ground zero for climate change and the unexpected testing ground for one of the Pacific's most innovative energy storage projects.

Bringing clean, reliable, and sustainable energy to our community.

The 7.5 MW South Tarawa Renewable Energy Project (STREP) is located on the Bonriki water reserve. ADB says it will generate reliable, efficient and affordable solar-generated electricity to ...

The South Tarawa Renewable Energy Project (STREP) is being implemented by the Government of Kiribati with support from the Asian Development Bank (ADB) and other co-financers.
