Iberdrola Spain has begun commissioning the 225 MW Valdecañas pumped hydro energy storage (PHES) plant and expects to begin work on another, 1.8 GW site, in Ourense, this year.

It allows the storage of surplus energy from unmanageable renewable energy sources, solar and wind, to be delivered at the times when it is most needed, providing stability to the ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes ...

Discover how pumped-storage power plants play a crucial role in the transition to a more sustainable and efficient energy matrix with Iberdrola Spain.

Accelerated growth of energy storage facilities in Spain, including large hybrid projects with renewables. National and European industrial innovations support advanced solutions adapted to European ...

Zelestra will build the 170MWp/400MWh solar-plus-storage project in Trujillo, in Extremadura, with construction expected to begin in the "second half" of 2025. EDP will buy the ...

A significant winner is Iberdrola España, which was awarded energy storage projects in six autonomous communities in Spain for a total of EUR170 million (USD 198 million) to build batteries, ...

Listed below are the five largest energy storage projects by capacity in Spain, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

Earlier this year, Iberdrola's 275 MW Valdecañas pumped storage project in Caceres, Spain, received administrative authorization from the Ministry for Ecological Transition and ...

Spain is poised to lead Europe in renewable energy by constructing the continent's largest pumped storage

Spanish energy storage power plant

power plant. Managed by Iberdrola, the Conso II project in Ourense, in Galicia, will ...
