---

Find the latest statistics and facts on energy storage.

In 2020, global installed grid-scale battery capacity was just under 28 GW, and the year saw about 11 GW in new additions. By 2024, battery storage showed explosive growth: 69 GW was...

The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook ...

Strong growth occurred for utility-scale battery projects, behind-the-meter batteries, mini-grids and solar home systems for electricity access, adding a total of 42 GW of battery storage capacity globally.

February 3 - Demand for battery storage is rising on the back of massive investment in solar and wind power, wider electrification efforts and a need to strengthen grid reliability.

Utility-Scale Battery Storage Parameter value projections by scenario, financial case, cost recovery period, and technological detail. Select the parameter (LCOE, CAPEX, Fixed O& M, Capacity Factor, ...

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

Global battery storage capacity surpasses hydropower, driven by renewables growth, falling costs, and rising demand for grid flexibility worldwide.

In 2025, capacity growth from battery storage could set a record as operators report plans to add 19.6 GW of utility-scale battery storage to the grid, according to our January 2025 ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based,

# Storage capacity of energy storage batteries

sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated power in 2024, 8 ...
