We have many years of experience in lightning and surge protection and, thanks to numerous system tests for the wind power industry, the expertise to develop effective lightning protection systems for ...

This durable, outdoor network enclosure comes with a power supply that provides up to 350W (55V DC, 6.3A) of power to industrial equipment, such as PoE switches, injectors and wireless access points.

In this blog post, I will share my experience and knowledge on how to design an efficient and reliable power distribution cabinet for a wind power project. Before starting the design process, it is crucial to ...

Fibox provides leading wind turbine manufacturers with a selection of weather tight electrical enclosures to protect the equipment in all environments.

Learn how we've joined forces with Siemens Energy to fast-track data center construction and reduce deployment timelines by up to two years. Wall-mount cabinet secures and organizes 12U of 19-in. ...

Outdoor power cabinets, DC power systems, batteries, rectifiers, radio enclosures, and equipment racks for telecommunications equipment backup and protection, site optimization, power protection, and ...

Strikesorb®; Provides Unparalleled Lightning and Surge Protection for Wind Turbine Systems As more wind farms are built, turbine manufacturers and wind farm operators are becoming increasingly ...

OVR WT A dedicated surge protection device is needed to protect wind turbines generators and converters. The OVR WT SPDs can withstand the high pulse with modulation (PWM) peak transient ...

With decades of expertise, we deliver durable, high-performance, and internationally certified surge protection solutions for wind turbine systems. Our SPD for wind turbine designs are DIN-rail mounted ...

Surge-proof network cabinets for wind power generation

Integrating surge protection into wind towers becomes crucial to safeguarding these valuable assets and ensuring efficient energy generation. Surge protection is engineered to divert ...
