Investing in a solar power system is a significant financial commitment, and the combiner box is an important part of that system. A comprehensive warranty reduces the risk of financial ...

Solar technologies are categorized as either passive or active depending on the way they capture, convert and distribute sunlight and enable solar energy to be harnessed at different levels around the ...

This Limited Warranty does not include any cost of labor related to (1) un-installing Covered Product; (2) re-installing a repaired or replacement product, or (3) the removal, installation ...

Need Help? If you are having problems logging into SOLAR, there are a number of self-help and support resources available to you:

Plug-in solar has remained in the shadows because of a lack of safety standards and often costly requirements imposed by utilities, but that's changing.

Five and ten year warranty extensions can be purchased at any time during the factory warranty coverage period. The maximum total warranty coverage period is 20 years.

Solar energy is radiant energy from the sun--a fully renewable energy resource. We use the solar resource to provide daylight, electricity, and heat in four ways (in order of prevalence): Solar PV is ...

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

Warranty Duration: One (1) year, unless applicable law requires a longer period, in which case it will be that period of time.

The solar combiner box has a warranty period

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. has some of the ...

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for heat and to ...
