The project consists of a 10MW solar photovoltaic Power Plant located on a 20 hc site in Gabes capable of producing over 24 GWh per year of carbon free power. The power plant will be connected to the ...

This article explores optimal sizing strategies, real-world applications, and energy-saving potential for shopping malls in Tunisia's Mediterranean climate.

Explore Tunisia's protected solar market, driven by government policy. Learn how to launch a turnkey solar factory and meet local demand with our expert blueprint.

Namely, consumers could use a solar kit to power several appliances through renewable energy if they are unable to deploy an entire household solar system due to size, costs, or grid connection constraints.

These large-scale solar farms are not only helping Tunisia reduce its carbon footprint and dependence on fossil fuels but are also contributing to the country's broader economic goals.

At the heart of this initiative lies a state-of-the-art 948 kWp solar roof system, destined for the Mall of Sousse in Kal#226;a Kebira. The Mall of Sousse is an architectural marvel that spans over...

Learn about the technology, installation, and benefits like cost savings and sustainability. Explore real-world examples and challenges that showcase how malls are embracing clean energy to reduce their ...

Shopping malls and similar venues present attractive, big-time opportunities as potential sites for grid-connected solar power, energy storage and intelligent, highly energy-efficient facilities management.

Anglo-Tunisian group SoleCrypt announced plans for a 60 MW PV plant in Tozeur, part of a broader initiative to connect eventually to the Medusa submarine cable, enhancing Tunisia's energy...
