Where can I find 5G reception Australia?

5G reception Australia How to find your nearest mobile cell tower? The simplest way to find your nearest mobile cell tower is to go to the Radio Frequency National Site Archive (RFNSA) website. The website is managed by the Australian Mobile Telecommunications Association on behalf of the Mobile Carriers Forum.

How do I find mobile phone base station sites in Australia?

You can use the Radio Frequency National Site Archive (RFNSA) website to search for active and proposed mobile phone base station sites in Australia. Each site has a dedicated information page that includes the site's location, an Environmental EME Report, the carrier's contact details, and other relevant community consultation information.

What is the difference between a 5G base station and a small cell?

Small cells have a lower power output than older base stations. This means they have lower EME emissions. 5G base stations can also go into 'sleep mode' when they are not in use. This means their power output and EME emissions will be lower than 4G base stations.

Do 5G base stations have a 'sleep mode'?

5G base stations can also go into 'sleep mode' when they are not in use. This means their power output and EME emissions will be lower than 4G base stations. Through audits, investigations and site inspections, we check telcos stay in the safe EME levels.
