What is Djibouti's new solar project?

The project will be the first solar Independent Power Project (IPP) in Djibouti and will be located in Grand Bara, south of Djibouti City. The solar project is being fully developed by AMEA Power under a Build-Own-Operate and Transfer (BOOT) model and will generate 55 GWh of clean energy per year, enough to reach more than 66,500 people.

Why did Djibouti open up electricity production to independent operators?

For the government, the aim was to open up electricity production to independent operators so as to achieve energy independence as soon as possible. It should be noted that the state-owned company *Electricité de Djibouti* retains a monopoly on the transmission and distribution of electricity. The project was developed by Red Sea Power (RSP).

Will Djibouti be the first country to produce 100% green energy?

In its bid to become the first country on the continent to produce 100% green energy by 2035, Djibouti can also draw on other ambitious projects. These include the solar power project in the Grand Bara desert, for which work began in 2020.

Does Djibouti have a monopoly on electricity?

It should be noted that the state-owned company *Electricité de Djibouti* retains a monopoly on the transmission and distribution of electricity. The project was developed by Red Sea Power (RSP). "This site has the best wind energy potential in Africa, alongside Tangiers in Morocco," says François Maze, its CEO.

AMEA Power is rapidly expanding its investments in wind, solar, energy storage and green hydrogen, demonstrating its long-term commitment to the global energy transition.

Summary: Djibouti's new energy storage power station marks a pivotal shift toward renewable energy integration and grid stability.

In September 2023, Djibouti inaugurated its first wind farm in the north of the country. Add solar farms, geothermal power and biomass plants, and Djibouti hopes to become the first ...
