The policy provides that the grid-connected photovoltaic power generation project, the state will in principle by photovoltaic power generation system and its supporting transmission and distribution ...

Government incentives for solar aim to make adopting solar energy more accessible and affordable for both homeowners and businesses. These incentives come in various forms, such as ...

Armenia is a country with enormous solar energy potential. Energy flow per square meter is about 1,720 kWh compared to the European average of 1,000 kWh. Accordingly, the Armenian government is providing various incentives to promote solar energy self-consumption practices. For example, residential consumers are exempt from regulations if they have an installed capacity of up to 150 kWh. Per amendments made in 2017, the limit for commercial consumers has been increased, and in the ca...
